

## F-2: Friendship Week-Denise Van Doorn

The idea of Friendship week occurs during the week of Valentine's Day. Each day we do something special to encourage people to make new friends. The attached is an example a few years ago. Since then we have added the making of friendship bracelets at lunch...you know the kind the kids are wearing.....use threads or beads or both. We set aside our fitness lab as a room to do the work during lunch...we had expert kids at each table to teach and help others make one. Kids loved making the bracelets and came back every day to make another one. This year we will probably need to do this noon activity in the multipurpose room since it is so big!

Each day during friendship week we have a new spirit day as well...other clubs get involved and sell grams, balloons or flowers.
