A HELPLINE FOR SCHOOLS

Social Media Helpline FOR SCHOOLS

#iCANHELP delete negativity on social media

Google ask.fm ClassDojo

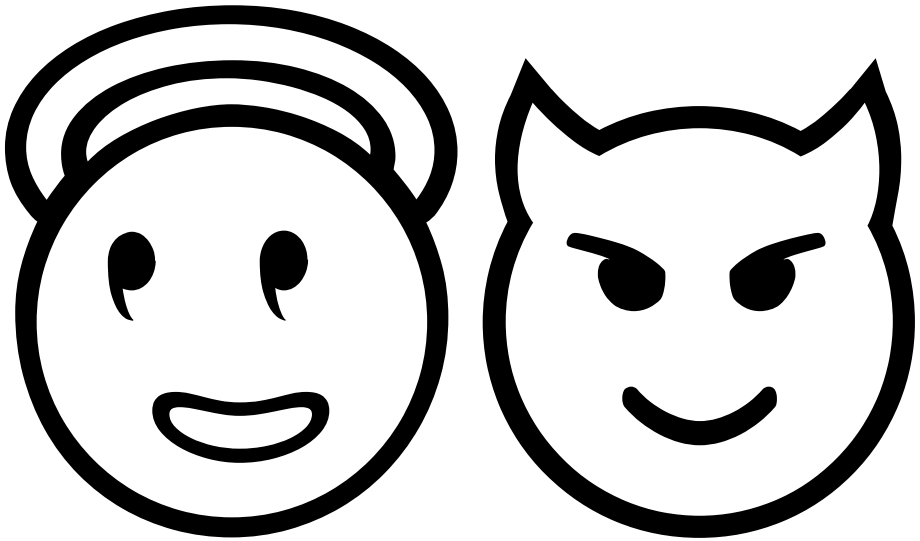
Hub of a help ecosystem

- **Known & trusted** by the social media cos.
- **Growing database** of case studies
- **Part of a global network** of helplines
- **Deep expertise** in student leadership and digital literacy & leadership

#iCANHELP
delete negativity on social media

A Thought

Technology and the Internet are only as good as the people who use it



THIS IS THE INTERNET
Large, diverse and loud

All in perspective

1 billion daily users with 934 million daily mobile users – 83.6% of active daily users are outside the US

400 million daily users 75% of whom are outside the US

300 hours of video posted every minute

250 million daily users

100 million daily users that share 8,796 photos per second and 6 billion daily video views

Not exactly an epidemic…

- **14.8%** of U.S. students in grades 9-12 had been cyberbullied (**19.6% bullied**)
- 9th graders (16.1%) more than 12th graders (13.5%)
- Cyberbullying more prevalent among white than black and hispanic students
- **Cyberbullying < bullying**: "The prevalence of having been electronically bullied *decreased* from 2011 (16.2%) to 2013 (14.8%)."

CDC

Centers for Disease Control and Prevention

CDC 24/7: Saving Lives, Protecting People™

Bullying, cyberbullying, 'mixed'

- **34%** of youth had experienced harassment of some kind over the previous year, more than half of the 34% (**54%)** involving *no tech*, **15%** *only* tech and **31% mixed** (tech & in-person)
- Negative impact of tech-only "significantly *lower*" than in-person, and in-person "significantly lower" than mixed
- The challenge of mixed harassment less about the tech and more about "the relational nature of mixed harassment"
- *Social literacy training needed*

CRIMES AGAINST CHILDREN RESEARCH CENTER

The facts on ‘sexting’

- Data all over the map – from 1% having sexted to 27% (half the latter only once)
- A spectrum of behaviors and intentions
- Harmful when it involves coercion (digital form of sexual harassment)
- Not helpful to teens to hype it
- “Aggravated” vs. “Experimental” (there’s a typology)
- Part of sexual health education not “Internet safety”

Why do these facts matter?

Case Study #1

Platform: Ask.fm

Age: High School

Scenario: Students were using Ask.fm as a tool to gather private information on students at their school.

Case Study #2

Platform: Twitter

Age: High School

Scenario: Students were using information collected on Ask.fm and posting that to a private Twitter account.

Case Study #3

Platform: Instagram

Age: High School

Scenario: A parody account created to make fun of a popular existing school account.

Modeling good behavior
